Case Study 1: Adventure and Trekking Website

WEBPAGE OUTPUT

A responsive outdoor adventure website featuring popular trekking routes, difficulty levels, trip schedules, an equipment checklist, safety guidelines, and sample adventure package prices.

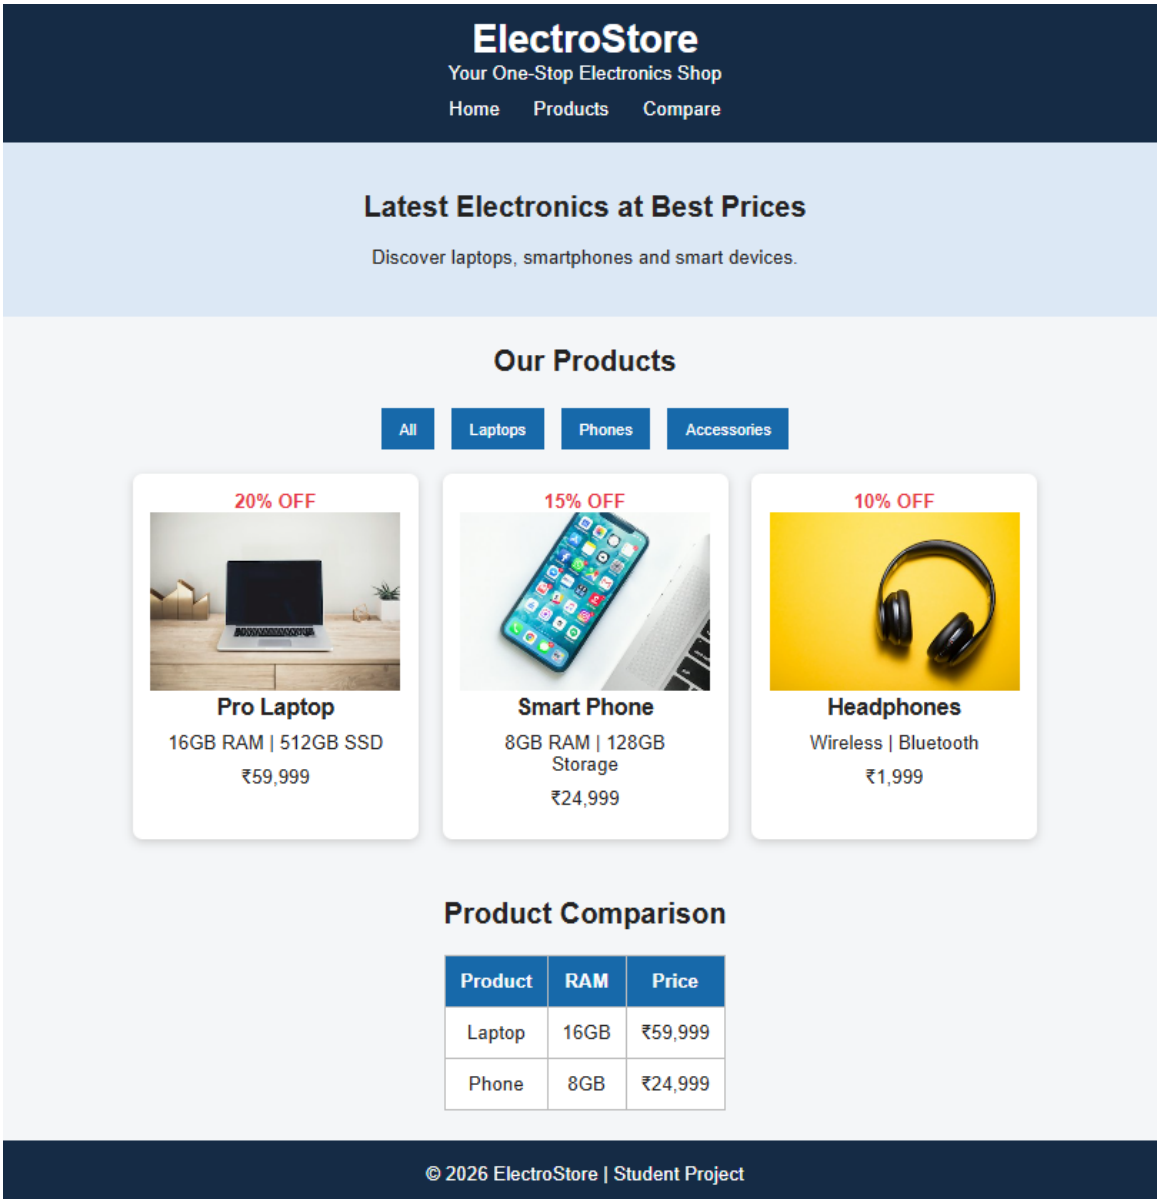

Implemented sections: Navigation menu, mountain-image hero banner, trekking route cards, trip schedule, equipment checklist, safety guidelines, and packages.

Case Study 2: Electronics Store Website

WEBPAGE OUTPUT

An online electronics catalog presenting laptops, smartphones, and accessories with product images, specifications, discount labels, sample prices, category filters, and a comparison table.

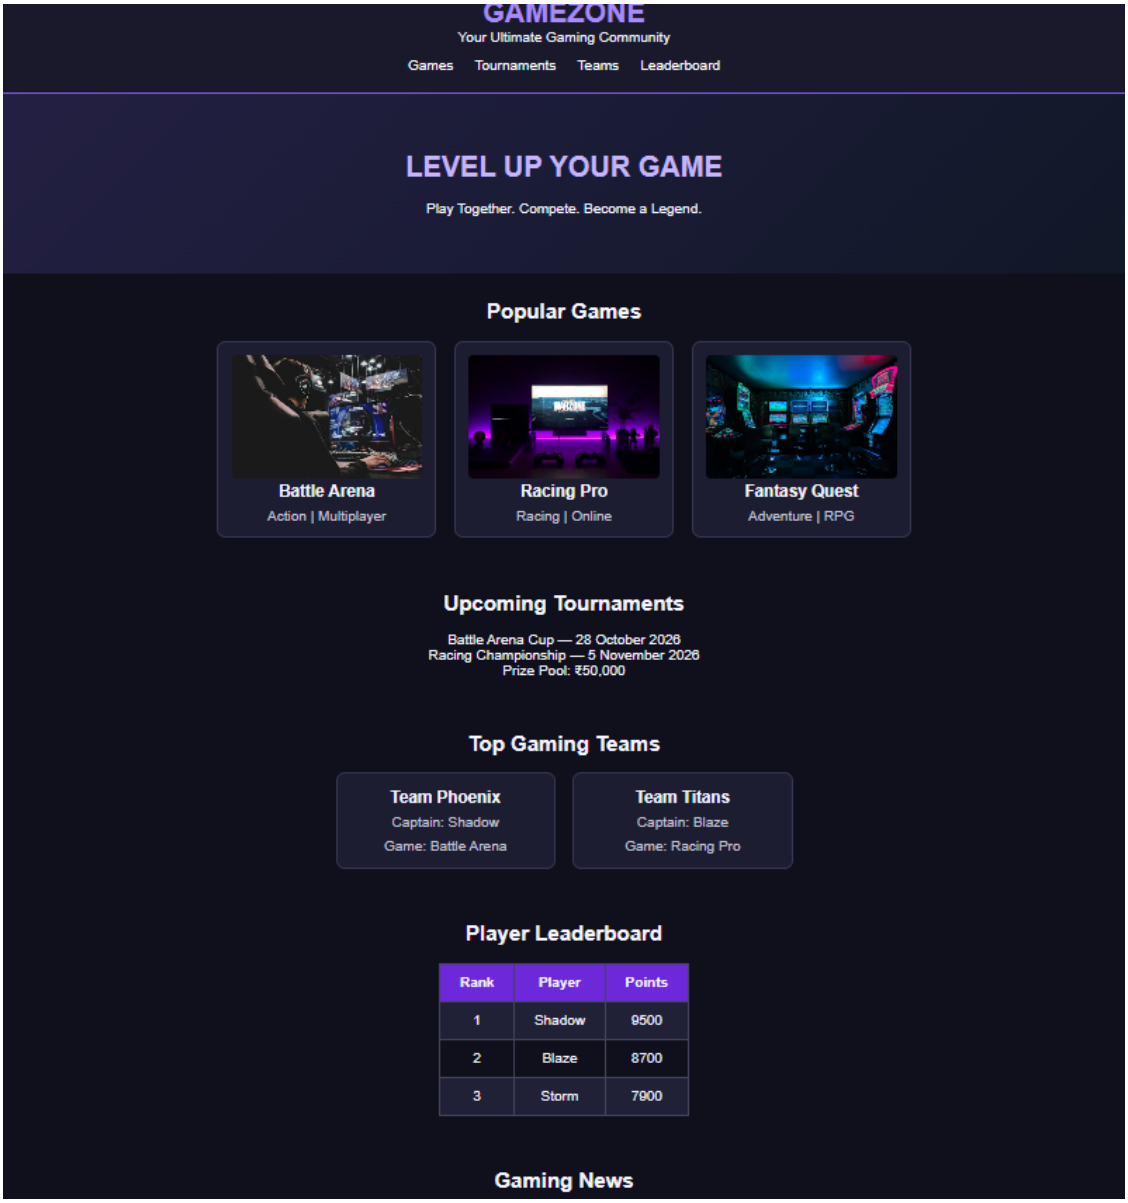

Implemented sections: Product category buttons, product cards, discount labels, device specifications, and product comparison table.

Case Study 3: Gaming and Esports Community Website

WEBPAGE OUTPUT

A dark-themed gaming portal showcasing popular game profiles, upcoming tournament schedules, team information, player rankings, and gaming news with CSS hover effects and a structured leaderboard.

Implemented sections: Game cards, tournament schedule, team profiles, leaderboard table, gaming news, and a dark visual theme.

Note: The screenshots above show the actual webpage outputs supplied for this report.
